APPENDIX B

Graduation Project Final Documentation Requirements

B.1 — General Formatting Guidelines

Document Length	50–70 pages (excluding cover, tables of contents, references, and appendices)
Font	Times New Roman or Arial, 12pt for body text
Line Spacing	1.5 for body text; single spacing for tables and captions
Margins	2.5 cm on all sides
Page Numbers	Bottom center, starting from Chapter 1
Figures and Tables	High resolution; numbered and captioned; listed in a separate List of Figures/Tables
References	IEEE format; minimum 10 references
Language	English (unless the department head approves Arabic; bilingual abstract required in all cases)
Submission Format	PDF via the faculty platform, plus ONE bound printed copy
Submission Deadline	As announced in Appendix B.4 (Delivery Schedule)

B.2 — Required Document Structure

All graduation project documents must follow the structure below. Departments may add domain-specific sub-sections within the defined chapters without removing any required element.

Cover Page

- University name, faculty name, department name
- Project title
- Academic year
- 'Graduation Project' designation and document type (Phase 1 / Final)
- Supervisor(s) name(s) and title(s)
- Team member names and student IDs

Front Matter

- Table of Contents (with page numbers)
- List of Figures
- List of Tables
- List of Abbreviations
- Abstract (Arabic and English, 150–250 words each): problem, approach, outcome

Chapter 1: Introduction

- 1.1 Background and Motivation
- 1.2 Problem Definition
- 1.3 Project Objectives and Proposed Solution
- 1.4 Project Scope and Limitations

2/5
C.C.

- 1.5 Development Methodology
- 1.6 Tools and Technologies Used (Software and Hardware)
- 1.7 Project Timeline / Gantt Chart
- 1.8 Report Organization

Chapter 2: Related Work

- Overview of existing systems, research, or solutions in the same domain
- Comparative analysis: what distinguishes this project from existing work
- All sources properly cited using IEEE format

Chapter 3: System Analysis

- 3.1 Stakeholder Analysis
- 3.2 Functional Requirements
- 3.3 Non-Functional Requirements
- 3.4 Use Case Diagrams with actor descriptions
- 3.5 Feasibility Study (technical, economic, and operational — brief)

Chapter 4: System Design

- 4.1 System Architecture / Component Diagram
- 4.2 Class Diagrams
- 4.3 Sequence Diagrams (for key use cases)
- 4.4 Database Entity-Relationship Diagram (ERD) — if applicable
- 4.5 User Interface Wireframes / Mockups
- 4.6 Security Design Considerations
- Note: Research-track projects replace design chapters with Research Methodology, Experimental Setup, and Data Analysis chapters.

Chapter 5: Implementation

- 5.1 Implementation Environment and Setup
- 5.2 Key Implementation Details (algorithms, modules, major decisions)
- 5.3 Sample Screenshots / Output Samples

Chapter 6: Testing and Evaluation

- 6.1 Testing Strategy
- 6.2 Test Cases and Results (table format)
- 6.3 Performance Evaluation / Benchmarking (where applicable)
- 6.4 Limitations and Known Issues

Chapter 7: Conclusion and Future Work

- 7.1 Summary of Achievements
- 7.2 Lessons Learned
- 7.3 Future Enhancements

References

- IEEE-format numbered reference list
- Minimum 15 references, all must be cited in the text

Appendices (optional)

- User manuals, source code excerpts, raw data tables, additional diagrams

Handwritten signature in blue ink.

C.4 — Phase 2: Supervisor Evaluation Form

To be completed by the supervisor for each student individually. Submit via the platform before the final discussion date.

Project Title: _____ Academic Year: _____
 Supervisor Name: _____ Submission Date: _____

C.4.1 — Supervisor Final Evaluation (40 marks, per student)

Criterion	Description	Max Marks	Score
Overall Progress and Commitment	Student consistently progressed according to plan; meetings attended; tasks completed on time	8	
Technical Contribution	Student made meaningful, identifiable technical contributions to the project	10	
Understanding of the Field	Student demonstrates solid understanding of the project domain, tools, and methods used	8	
Problem-Solving and Initiative	Student proactively identified and resolved issues; demonstrated independent thinking	7	
Professionalism and Communication	Student communicated effectively, respected deadlines, and behaved professionally	7	
Total — Supervisor Final Evaluation		40	

Phase 2 Supervisor Total: _____ / 40

Individual Adjustment (if applicable): $\pm$ _____ marks. Reason: _____

(Adjustment allowed within $\pm 10\%$ of group average; requires written justification — see Article 14 of Bylaws)

Supervisor Name & Signature

Date: _____

٩/٤٨
٢٠٢٨
ف.ع.ع.

C.5 — Phase 2: Exam Committee Evaluation Form

To be completed by each committee member. The supervisor does not participate in this committee.

Project Title: _____ Discussion Date: _____

Committee Chair: _____

C.5.1 — Final Presentation (per student, out of 20)

Criterion	Description	Max Marks	Score
Title and Structure	Title clear and indicative; presentation well-organized with introduction, body, and conclusion	4	
Visual Aids	Slides are professional, readable, and appropriately detailed	4	
Delivery and Clarity	Presenter is clear, confident, and well-prepared	5	
Content: Objectives and Needs	Objectives clearly stated; user needs and benefits clearly addressed	4	
Content: Prototype Demonstration	System demonstrated live or via high-quality recording	3	
Total — Final Presentation		20	

C.5.2 — Final Discussion / Q&A (per student, out of 20)

Criterion	Description	Max Marks	Score
Technical Comprehension	Student understands all technical decisions, tools, and algorithms used	7	
Coherence and Confidence	Answers are logical, direct, and well-expressed	6	
Depth and Insight	Student can discuss trade-offs, limitations, and future improvements thoughtfully	7	
Total — Final Discussion		20	

C.5.3 — Final Document Quality (per team, out of 10)

Criterion	Description	Max Marks	Score
Completeness	All required chapters and sections are present and sufficiently detailed	2	
System Analysis	Requirements, use cases, and stakeholder analysis are thorough and consistent	2	
System Design	Design artifacts (class diagrams, sequence diagrams, ERD, architecture) are correct and complete	2	
Implementation & Testing	Implementation section demonstrates real work; test cases are documented with results	2	
Writing Quality & Referencing	Professional language, correct formatting, properly cited references (IEEE format)	2	
Total — Final Document (Committee)		10	

C.5.4 — Project Implementation and Live Demo (per team, out of 20)

Criterion	Description	Max Marks	Score
Project Scope and Complexity	Project size is appropriate to team size; level of complexity is commendable	3	
Field Relevance	Project addresses a genuine problem in the computing or AI field	3	
Novelty and Creativity	Project shows original thinking or an innovative approach to the problem	4	
Completeness of Implementation	System is fully or substantially functional; all core features work	6	
Live Demo Quality	System is demonstrated live and responds correctly to inputs	4	
Total — Implementation & Demo		20	

C.5.5 — Project Poster (per team, out of 10)

Criterion	Description	Max Marks	Score
Visual Design	Poster is visually attractive, well-organized, and professionally produced	3	
Content Coverage	Problem, solution, key results, and team details clearly presented	4	
Technical Accuracy	Information on poster is correct and consistent with the project document	3	
Total — Poster		10	

Final Presentation (C.5.1) _____ /20

Final Discussion (C.5.2) _____ /20

Final Document (C.5.3) _____ /10

Implementation & Demo (C.5.4) _____ /20

Poster (C.5.5) _____ /10

Committee Subtotal _____ /80

Supervisor (C.4) _____ /40

GRAND TOTAL — PHASE 2 _____ /120
